“Prismatica - Inspired by a prism’s ability to break light into different colors, symbolizing altered perspectives.”

This captures the idea of shifting perceptions and the transformation of ideas, just as light changes when it passes through a prism.

The inspiration for this design is pretty simple, a triangle might be a basic shape, however it can also be symbolized as “Growth and Change” where as a multimedia artist you would certainly be better off with changing along with how the world changes.

This can also be symbolized as “Unity and Connection” as it is very close to how I ‘am’ running my business as a person who collaborates with other artists in many different projects.

As for the use of colors, it does not really have a deep meaning to it, as it is a prism it is only natural for color to follow through, and much like how light passes through a prism, it breaks into a spectrum of colors.

However it can also be associated with the concept of clarity, focus, or complexity depending on the context.
